*Report of the Jury (April 13, 1985)*

Considering the originality and the creativity of his work;

considering his discovery of vibrationnels novel modes of surface in the ionic crystals, generally indicated by "Lucas modes";

considering his work of pioneer on the interactions between electrons and modes of surface which contributed a determining share for the comprehension of the surface dynamic processes;

considering the clarification of the importance of the role of the plasmons of surface in the surface energy of metals;

considering his theory of the internal forces in irradiated materials and in particular the formation of rare gas bubbles in materials of the nuclear reactors and the way in which they cause the partial destruction (blistering) on the surface;

decide to award the Francqui Prize 1985 to Mr Amand LUCAS, Professor at the Facultés Universitaires Notre-Dame de la Paix à Namur.

Jury members :

**Professor Thomas J. WILLMORE**

Professor at the University of Durham
